-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03/09/03.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-13 in Paper No. 5 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of copending Application No. 10/078,207. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending claims are directed to a beer or malt based beverage, while the instant claims are directed to an alcoholic beverage, and it would have been obvious to one of ordinary skill in the art to produce a beer as the alcoholic beverage, as it is a notoriously well known alcoholic beverage.

Art Unit: 1761

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-4, 7, 8 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7, 8 and 10 are indefinite because the use of the phrase “such as” does not clearly indicate whether the mentioned antioxidants are claimed or not.

Claim 3 is indefinite because the scope of the phrases “highly bioavailable supplemental protein” and “highly nutritious” is unknown.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7, 9 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lux (UK Pat. No. 367,063).

Art Unit: 1761

Lux teaches the production of a vitamin containing beer, which is inherently carbonated. Lux teaches that "beer can be rendered vitamin-containing by destroying either the fermentation yeast used or separately cultivated yeast and adding the cell sap obtained, which contains the vitamins of the yeast unaltered, to the finished beverage. By the use of the yeast vitaminising the beverage the result is obtained that her desired vitamins B and E are added thereto, as the yeast is very rich in such vitamins," (Page 1, lines 39-49).

Yeast is notoriously well known for containing not only vitamins, but also minerals, protein, and antioxidants (such as methionine sulfoxide reductase). Therefore, the beer of Lux anticipates the claims. It is noted that while the method of producing the beer may be different that applicant's disclosed method, because the claims are directed to products, rather than processes, any process limitations are given no patentable weight.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6, 8, and 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lux.

Lux teaches that cited above but is silent as to the exact amount added of the individually claimed components of the beer. The whole thrust of the patent is to provide a vitamin rich beer and therefore it would have been obvious one of ordinary skill in the art to optimize the claimed

Art Unit: 1761

ingredients so as to produce a beer that is the most nutritious, as the amounts of said ingredients are result effective variables. Further, the claimed ingredients of claims 8, and 1-12 are all notoriously well known beverage additives and therefore it would have been obvious to one of ordinary skill in the art to add such additives to the beer of Lux.

Applicant's attention is invited to *In re Levin*, 84 U.S.P.Q. 232 and the cases cited therein, which are considered in point in the fact situation of the instant case, and wherein the Court stated on page 234 as follows:

This court has taken the position that new recipes or formulas for cooking food which involve the addition or elimination of common ingredients, or for treating them in ways which differ from the former practice, do not amount to invention, merely because it is not disclosed that, in the constantly developing art of preparing food, no one else ever did the particular thing upon which the applicant asserts his right to a patent. In all such cases, there is nothing patentable unless the applicant by a proper showing further establishes a coercion or cooperative relationship between the selected ingredients which produces a new, unexpected, and useful function. *In re Benjamin D. White*, 17 C.C.P.A. (Patents) 956, 39 F.2d 974, 5 U.S.P.Q. 267; *In re Mason et al.*, 33 C.C.P.A. (Patents) 1144, 156 F.2d 189, 70 U.S.P.Q. 221.
